Professional Summary

Data Analyst with a Public Health foundation and hands-on experience turning raw employee, retail, customer, and healthcare datasets into dashboards and insights that support decision-making. Skilled in SQL (joins, CTEs, window functions), Power BI (DAX, Power Query, data modeling), Tableau, and Excel, with 6 completed analytics projects spanning KPI reporting, sales and churn analysis, and disease surveillance. Comfortable owning the full analytics lifecycle: gathering requirements, cleaning and modeling data, building interactive visualizations, and presenting findings to non-technical stakeholders.

Core Competencies

Data Analysis & Visualization: SQL (SQL Server), Power BI, Tableau, Excel (Power Query, Pivot Tables), DAX

SQL Development: Joins, CTEs, Window Functions, CASE Statements, Aggregations, Data Extraction & Shaping

Data Management: Data Cleaning & Transformation, Data Modeling, Relational Databases, Data Quality Checks

Analytics & Reporting: KPI Dashboard Design, Trend & Churn Analysis, Ad Hoc Reporting, Data Storytelling

Domain & Delivery: Public Health Surveillance, Healthcare Operations, Retail & Sales Analytics, Project Management (CAPM), Stakeholder Communication, Documentation

Selected Analytics Projects

Workforce Analytics & Attrition Dashboard — Power BI / DAX

- Designed interactive Power BI dashboards analyzing 1,470 employee records, covering attrition, job satisfaction, and performance by department, age group, education, and marital status, using DAX measures and KPI visuals.
- In a companion attrition deep-dive of 606 employees, identified a 14.69% attrition rate and pinpointed R&D as the highest-risk department (66% of total attrition), with the 26–35 age group most affected.

BlinkIT Grocery Sales Analysis — SQL / Power BI

- Wrote SQL queries using CTEs, CASE statements, and aggregations to clean and shape transactional sales data, then built a Power BI dashboard tracking total sales, average sales, customer ratings, and outlet performance to surface top- and under-performing outlet types.

Customer Churn & Revenue Analysis — Power BI

- Analyzed customer behaviour and revenue trends to identify churn patterns and at-risk customer segments, producing dashboards that quantify revenue impact and support targeted retention strategies.

Pizza Sales Annual Performance Analysis — Tableau

- Analyzed a full year of restaurant sales, \$817K in revenue across 21,350 orders, building a Tableau dashboard that surfaced daily and monthly order trends and identified Classic-style pizzas as the top category at 26.9% of sales.

Malaria Surveillance & Trend Analysis Dashboard —SQL/ Power BI

- Performed trend analysis on malaria surveillance data, building interactive dashboards highlighting reported cases, regional comparisons, and seasonal patterns to support evidence-based public health monitoring.

Professional Experience

Data Analyst

01/2026 - Present

Luma Brand Digital Agency — Nigeria

- Deliver data analysis and reporting support for the agency and its clients, turning campaign and business data into dashboards that guide decisions.

- Clean, shape, and model raw business data for analysis using SQL, Power BI, and Excel.
- Build interactive dashboards and reports that surface KPIs and support client decision-making.

Data Analysis Tutor

4/2025 - 12/2025

Tech Challenge Academy — Nigeria

- Teach data analysis fundamentals, including Excel, SQL, and Power BI, guiding learners from data cleaning through dashboard design and interpretation.
- Design hands-on exercises and real-world practice datasets that help students build portfolio-ready analytics projects.
- Provide one-on-one mentoring and feedback on student projects, strengthening their analytical thinking and data storytelling skills.

Primary Health Care Intern

07/2024 –

09/2024

Odo-Esa Primary Health Centre — Nigeria

- Collected, organized, and maintained patient and immunization records across maternal and child health services, ensuring data accuracy, completeness, and confidentiality.
- Compiled and documented healthcare service data used for facility-level reporting and programme monitoring.
- Supported community outreach and health education programmes, gathering field data that informed service delivery planning.

Sales Representative

10/2021 –

01/2022

Peniel Prestige Limited — Nigeria

- Maintained daily sales and inventory records with high accuracy, preparing daily sales summaries used for management review.
- Tracked stock movement and flagged discrepancies between records and physical inventory, improving record reliability.
- Built customer relationships through proactive follow-up and service, supporting repeat business and smooth shop operations.

Education

B.Sc. Public Health (Second Class Upper)

2025

Lead City University — Ibadan, Nigeria

Certifications

- Certified Associate in Project Management (CAPM) — Project Management Institute
- CITI Program — Public Health Research; Responsible Conduct of Biomedical Research
- Jobberman Soft Skills Training; Professionalism in the Workplace
